OFFICIAL CORPORATE CAPABILITY DECK • 2026

Bespoke Software Engineering for High-Growth Businesses

Rahnoxa designs, architects, and engineers scalable web platforms, mission-critical ERP systems, mobile applications, and AI voice automation workflows. We build direct, typed, maintainable systems with zero agency overhead.

100+	14	100%	30 Days
TECHNOLOGIES & TOOLS	CORE SERVICES	CLIENT CODE OWNERSHIP	POST-LAUNCH WARRANTY

ENTERPRISE POSITIONING

Single Database Authority & Type-Safe Delivery

We eliminate fragmented tools, spreadsheet chaos, and fragile no-code workarounds by building tailored software directly adapted to your operational workflows.

01 / DIRECT ARCHITECT

Direct Senior Engineering

Collaborate 1-on-1 with the senior systems architect who models database schemas, writes the APIs, and manages deployment. Zero agency middlemen or outsourced junior engineers.

02 / DATABASE AUTHORITY

Supabase PostgreSQL ACID

Supabase PostgreSQL is our permanent relational database authority, enforcing strict Row-Level Security (RLS), ACID transactions, and zero-loss audit log preservation.

03 / ZERO VENDOR LOCK-IN

100% Client Ownership

Full Git repository transfers on day one. You own all code, configurations, database migrations, and commercial intellectual property with complete deployment documentation.

Transparent Milestone Velocity

Standard builds delivered in 5-7 business days; complex SaaS platforms in 2-4 phased sprint weeks.

Dedicated Engineering Bandwidth

Focused sprints with direct WhatsApp and live video check-ins for continuous stakeholder alignment.

Enterprise Uptime SLA

30-day post-launch technical bug-fix warranty included on every single production release.

GUARANTEED ARCHITECTURAL STANDARDS

Why Businesses Partner With Rahnoxa

Unlike generic agencies that rely on outsourced teams and bloated templates, Rahnoxa focuses on technical precision, sustainable architecture, and dependable milestone delivery.

01 Custom-Built Architecture

We tailor frontend, backend, and data models to your actual business requirements instead of forcing you into generic templates or rigid SaaS containers.

- ✓ Bespoke relational schema modeled for your exact workflow
- ✓ Zero unnecessary dependencies or runtime baggage
- ✓ Sub-second API response times and optimized payloads

02 Full-Stack Capability

From reactive web applications and mobile apps to database schemas and API integrations, we handle the complete technology scope in-house.

- ✓ End-to-end type safety from React UI to PostgreSQL
- ✓ Cross-platform iOS and Android mobile development
- ✓ Microservices, background cron workers, and WebSockets

03 Flexible Engagement Models

Work with us on fixed-scope milestone projects, dedicated feature sprints, or ongoing technical maintenance retainers without hidden fees.

- ✓ Fixed-price milestone contracts with explicit acceptance criteria
- ✓ Staging environments for continuous stakeholder review
- ✓ Transparent scope boundaries preventing budget creep

04 Clean, Maintainable Code

We prioritize readable, well-structured TypeScript and modern frameworks to ensure you can scale and extend your software without technical debt.

- ✓ Strict ESLint and TypeScript compilation guarantees
- ✓ Automated tests verifying critical auth, APIs, and math
- ✓ Modular architecture built for seamless team handover

05 Transparent Communication

Direct communication, honest timeline estimates, and regular staging environment reviews throughout development with zero middle management.

- ✓ Direct WhatsApp and video sprint check-ins
- ✓ Live feature demos deployed to dedicated test URLs
- ✓ Direct engineering contact without account managers

06 Post-Launch Support & SLA

We remain available after deployment for bug fixes, performance monitoring, infrastructure scaling, and subsequent release cycles.

- ✓ 30-day comprehensive technical bug fix warranty
- ✓ Database backups, SSL certificates, and security patches
- ✓ Optional priority maintenance retainers with 4–8h SLA

ENTERPRISE SOLUTIONS

Software Engineering Services (Tier 1)

End-to-end custom digital systems engineered for speed, security, and commercial durability across web, mobile, and cloud environments.

Modern Website Design & Engineering

`React 18 • Vite • Tailwind • SEO`

High-performance, mobile-first business websites engineered with modern frameworks, fast load times, and conversion-focused layouts.

- ✓ Sub-second load speed with 95+ Core Web Vitals
- ✓ Direct WhatsApp click-to-chat & lead inbox
- ✓ On-page technical SEO schema & SSL setup

`Delivery: 5-7 Business Days (Express 48h)`

Full Stack Web Applications

`TypeScript • Node.js • Supabase Postgres`

Custom, scalable web applications with rich frontends, secure backend APIs, and structured relational database models built to streamline workflows.

- ✓ JWT auth, Row Level Security & role permissions
- ✓ Real-time data synchronization & export pipelines
- ✓ Automated business logic and audit logs

`Delivery: 2-4 Weeks (Phased Sprints)`

Mobile App Development

`Flutter • React Native • iOS & Android`

Cross-platform mobile applications for Android and iOS sharing robust logic, native device feature access, and cloud sync.

- ✓ Offline data persistence & background sync
- ✓ Push notifications, biometric auth, camera/GPS
- ✓ Google Play & Apple App Store deployment

`Delivery: 3-6 Weeks (Milestone Sprints)`

Custom Software & API Integration

`REST APIs • Webhooks • Redis • Razorpay`

Bespoke automation middleware, third-party API adapters, payment gateways, and custom integrations connecting disparate tools.

- ✓ WhatsApp Business Cloud API & SMS automation
- ✓ HMAC webhook signature validation & rate limiting
- ✓ Custom payment gateway integrations

`Delivery: 5-10 Business Days`

ERP & Enterprise Applications

`ACID Transactions • FIFO • GST Ledger`

Comprehensive operational platforms replacing spreadsheet chaos with unified inventory, billing, multi-branch, and staff management.

- ✓ Double-entry accounting & automated GST invoices
- ✓ Real-time inventory decrement & reorder alerts
- ✓ Role-Based Access Control (RBAC) & audits

`Delivery: 4-8 Weeks (Phased Rollout)`

SaaS Platforms & Desktop Software

`Tauri • Electron • Stripe / Razorpay`

Commercial multi-tenant SaaS products and high-speed cross-platform desktop applications engineered for high uptime and subscription billing.

- ✓ Multi-tenant schema isolation & usage metering
- ✓ Automated recurring billing & plan provisioning
- ✓ Cross-platform desktop binaries for Windows & Mac

`Delivery: 4-8 Weeks (Milestone Sprints)`

COMMERCIAL SERVICES & DIGITAL AUTOMATION

Digital Marketing, Automation & Retainers

Complementary digital services, business automation tools, and ongoing maintenance care designed to accelerate business growth.

Voice Call & IVR Telephony

`Twilio SIP • WebSockets • IVR Routing`

Automated PSTN call broadcasting, interactive voice response (IVR), and real-time AI telecaller pipelines connecting Twilio, SIP, and speech models.

- ✓ Multi-level IVR call routing & agent forwarding
- ✓ High-volume outbound voice broadcast notifications

`Delivery: 5-7 Days`

B2B Lead Generation & Local Dominance

`Data Extraction • ExcelJS • Verified Contacts`

Automated business discovery and data intelligence engines extracting categorized B2B leads with verification scoring and phone contacts.

- ✓ Local business prospecting across 50+ categories
- ✓ Phone & WhatsApp number verification pipeline

`Delivery: 3-5 Days`

SMS Marketing & Missed Call Alerts

`DLT Compliant • 99.8% Delivery • Webhooks`

Transactional SMS delivery, promotional broadcast engines, and virtual missed-call numbers with instant WhatsApp lead-back responses.

- ✓ Instant automated WhatsApp callback trigger
- ✓ DLT template registration & carrier compliance

`Delivery: 3-5 Days`

Technical Retainers & Emergency Rescue

`4-8h Hotfix SLA • Backups • Uptime Checks`

Rapid emergency website crash recovery, SSL/DNS fixes, malware sanitization, and continuous monthly software maintenance care.

- ✓ Critical bug repairs & performance tuning
- ✓ Continuous uptime telemetry & security patching

`Emergency: 24h • Retainer: Monthly`

STRUCTURED ENGAGEMENT

PHASE 01
Discovery & Architecture
Detailed requirements scoping, database schema design, API contract definition, and fixed-price milestone estimate.

PHASE 02
Sprint Implementation
Agile development cycles with continuous deployment to dedicated private staging URLs for live review.

PHASE 03
Production & Handover
Production deployment, complete Git repository transfer, documentation handover, and 30-day bug warranty.

Ready to Engineer Your System?
