

OFFICIAL CORPORATE CAPABILITY DECK

Engineering Modern Software Systems & Scalable Architecture

Rahnoxa is a registered MSME software development enterprise based in Jharkhand, India. We architect custom full-stack web platforms, multi-tenant SaaS products, enterprise ERP applications, and high-performance API integrations.

MINISTRY OF MICRO, SMALL & MEDIUM ENTERPRISES

100+

TECHNOLOGIES & STACKS

100%

SOURCE CODE OWNERSHIP

MSME

PERMANENT AUTHORITY

Built For Operational Longevity

We eliminate generic agency bloat and third-party lock-in through disciplined software craftsmanship and clear commercial terms.

Full Source Code Ownership

Direct Git repository transfers upon project completion. Zero vendor lock-in, zero proprietary runtime licensing fees, and 100% legal ownership.

Custom Relational Architecture

Structured Supabase PostgreSQL database schemas enforcing ACID transactional consistency, Row Level Security (RLS), and zero data degradation.

Static Typing & Type Contracts

Strict TypeScript interfaces across frontend components and API endpoints, catching schema mismatches before production deployment.

Predictable Milestone Delivery

Clear phase deliverables with fixed sprint scopes, live staging review environments, and an included 30-day post-launch warranty.

CORE ENGINEERING DISCIPLINES

Primary Software Services

TIER 1 • WEB APPS

Full-Stack Web Platforms

Reactive single-page web applications with sub-second rendering and responsive user interfaces.

- React 18 & TypeScript SPAs
- Tailwind CSS design systems
- Secure JWT session auth
- Cloudflare CDN distribution

TIER 1 • ENTERPRISE

Custom Operations ERP

Operational platforms eliminating spreadsheet chaos with role-based permissions and audit logs.

- Automated billing & GST engines
- Real-time multi-branch stock sync
- Staff attendance & payroll logic
- Financial reconciliation reports

TIER 1 • MOBILE

Cross-Platform Mobile

Native-feel compiled applications for Android and iOS sharing high-performance logic.

- Flutter & Dart cross-platform
- React Native mobile workflows
- Push notifications & deep links
- Offline data caching & sync

TIER 1 • SAAS

Multi-Tenant Platforms

Commercial SaaS foundations with isolated tenant data schemas and subscription billing.

- Schema-level tenant isolation
- Stripe & Razorpay payment hooks
- Custom domain & SSL routing
- Admin usage telemetry dashboards

TIER 1 • APIS

API Gateways & Webhooks

Standardized REST and asynchronous pipelines connecting internal software and external services.

- HMAC webhook signature validation
- WhatsApp Cloud API automation
- Redis caching & rate limiting
- Structured OpenAPI documentation

TIER 1 • MIGRATION

Legacy Modernization

Safely refactoring and migrating legacy PHP, .NET, CodeIgniter, or WordPress systems.

- Zero data-loss database sync
- Security vulnerability remediation
- Modern responsive UI re-skin
- Cloud hosting containerization

Ready-to-Deploy Enterprise Products

Battle-tested application architectures configured for rapid customization, reducing your time-to-market by up to 70%.

E-Commerce Marketplace

COMMERCIAL READY

Complete digital storefront with multi-category catalogs, coupon validation rules, live inventory deductions, payment gateway integration, and automated order tracking alerts.

Hyperlocal Grocery & Delivery

COMMERCIAL READY

Local dispatch platform enabling real-time cart building, store inventory synchronization, delivery agent routing, customer order status tracking, and delivery verification.

Food Ordering & Kitchen System

COMMERCIAL READY

Digital dining and takeaway portal featuring real-time kitchen order ticketing (KOT), modifier selections, table QR-code ordering, and direct WhatsApp invoice delivery.

Institutional School ERP

ENTERPRISE

Comprehensive campus administration software handling student admissions, automated fee invoice receipts, examination report cards, teacher schedules, and parent portals.

On-Demand Utility Ordering

COMMERCIAL READY

Field technician booking and dispatch portal with real-time job assignment, customer service checklists, digital signatures, and milestone completion logs.

Diagnostic Pathology ERP

HEALTHCARE

Clinical laboratory workflow management system supporting test appointment scheduling, digital report template generation, barcode tube tracking, and secure PDF report access.

Social Publishing Automation

MARKETING

Multi-account social media scheduling engine supporting scheduled post queues, media asset management, analytics tracking, and automated client status reporting.

Digital Smart Profile & NFC

NETWORKING

Interactive digital business identity cards with instant vCard downloads, direct WhatsApp calling, custom service catalogs, and one-tap NFC card compatibility.

100+ Production Technologies

We select battle-tested, maintainable frameworks prioritizing code longevity, strict type safety, and clean operational architectures.

STRUCTURED DELIVERY LIFECYCLE

5-Stage Engineering Execution

01**Discovery**

Operational audit & scope specification.

02**Architecture**

PostgreSQL schema & API contract modeling.

03**Engineering**

TypeScript sprints & staging previews.

04**Audit & QA**

Security scan & multi-browser verification.

05**Deployment**

Production cutover & full IP handover.

Ready to discuss your software project?

Consult directly with our engineering team for technical scoping, milestone pricing, and architecture reviews.
